

Nané Pr'Out

Director of Information Technology

NNProut@mdwgc.com

Philadelphia – 215.575.2594

Nané Pr'Out is a seasoned technology leader serving as Director of Information Technology at Marshall Dennehey, one of the largest defense litigation law firms in the United States. In this role, he leads enterprise IT strategy, operations, cybersecurity, and budget management, ensuring technology investments align with the firm's strategic priorities while supporting business growth and client service. He partners closely with firm leadership to balance innovation, risk management, and cost efficiency, delivering technology solutions that enhance the experience of attorneys, paralegals, and all business professionals without compromising security or fiscal discipline.

With a strong background in legal technology and information security, Nané is recognized for his strategic mindset, collaborative leadership style, and commitment to driving measurable outcomes. His work focuses on strengthening the firm's security posture, reducing organizational risk, and enabling everyone in the firm with reliable, modern tools that support high-quality legal service delivery. He has led initiatives that modernize infrastructure, optimize operational performance, and position the firm to adapt to evolving client expectations and industry demands.

Nané is an active contributor to the legal technology community, having spoken at industry conferences such as the International Legal Technology Association (ILTA) and participated in discussions on digital workplace transformation and global IT strategy. He maintains memberships in organizations including ILTA, the Information Systems Security Association (ISSA), and the Society for Information Management (SIM), and stays engaged with emerging trends and best practices shaping the legal and cybersecurity landscape.

He also serves on internal leadership initiatives, including the firm's Diversity, Equity & Inclusion Committee, where he helps foster a culture of inclusion, collaboration, and accountability across the organization.

In addition to his professional work, Nané is committed to community service and philanthropy, supporting organizations such as the Children's Hospital of Philadelphia and the National MS Society. His leadership philosophy centers on empowering others, encouraging innovation, and building resilient, people-focused technology organizations.
